

## Pre-Processing Machinery

### Grinder – Simple Mixer - Agglomerator

#### Heavy Duty Grinder

##### **Application :**

For Grinding the waste of solid plastic, PET Bottels.

##### **Features :**

- Availability of different models to match the customer requirements
- Specially designed and Hardened Blades to ensure longer life
- Use of Heavy Duty Bearings
- Sturdy Sructure made from M.S.
- Machine equipped with AC Motor with Star-Delta Starter

Pre-Processing  
Machinery

#### Simple Mixer

##### **Application:**

For Mixing and Preheating the material before Processing.

##### **Features:**

- Different models as per required Batch Capacity
- Specially designed Blades to ensure Uniform mixing
- Use of Heavy Duty Bearings
- Sturdy Structure made from M.S.
- Machine equipped with AC Motor with Star-Delta Starter

#### Agglomerator

##### **Application:**

For Densifying the waste of Plastic Film, Raffia waste etc. and convert it In to the suitable form for further processing.

##### **Features:**

- Different models as per required Batch Capacity
- Specially Designed and Hardened Blades to ensure longer life
- Use of Heavy duty Bearings
- Sturdy Structure made from M.S.
- Machine equipped with AC Motor with Star-Delta Starter
